BREATHWORK

In today's fast-paced corporate environment, employees find themselves struggling with change, stress, anxiety, and overwhelm. Amidst the chaos, there lies a simple yet profound solution: conscious breathing.

By learning the skill of conscious breathing, individuals can regain a sense of peace, calm, and control in their daily lives.

Our breathwork sessions offer easy-to-follow techniques to:

- **Reduce Stress in Three Exhales:** experience the transformative power of breath to swiftly alleviate stress and tension, fostering resilience.
- **Energy and Focus Boost:** learn to use the breath to boost energy levels and focus, even during extended periods of desk work.

We teach four foundational breathwork techniques, that each serve their own unique purpose:

1. **Vagus Nerve Breathing:** Calms the nervous system, reduces anxiety, and promotes overall well-being by shifting the body into a restful state.
2. **Box Breathing:** Enhances mental focus, optimises performance, anchors the mind, and provides energy.
3. **Natural Breathing:** Boosts energy levels, stamina, while reducing blood pressure and muscle tension.
4. **Coherent Breathing:** Reduces stress, sharpens focus, and enhances productivity by promoting calm and balance.

We offer practical insights for integrating breathwork into daily routines, providing employees with simple and effective stress reduction strategies.
